

§ 591.216

area has three survey areas: the District of Columbia, the Maryland suburbs of the District of Columbia, and the Virginia suburbs of the District of Columbia. OPM collects non-housing data throughout the survey area. OPM may collect housing data throughout the survey area or in specific housing data collection areas. The following table shows the survey areas:

SURVEY AND DATA COLLECTION AREAS

COLA areas & reference areas	Survey area
Anchorage	City of Anchorage.
Fairbanks	City of Fairbanks.
Juneau	Juneau, Mendenhall.
Rest of Alaska	See paragraph (c) of this section.
Honolulu	City and County of Honolulu.
Hawaii County	City of Hilo, Kailua-Kona area.
Kauai	Kauai Island.
Maui	Maui Island.
Guam & CNMI	Guam.
Puerto Rico	San Juan area.
U.S. Virgin Islands.	St. Croix, St. Thomas, St. John (housing data only).
Washington, DC-DC.	District of Columbia.
Washington, DC-MD.	Montgomery County and Prince Georges County.
Washington, DC-VA.	Arlington County, Fairfax County, Prince William County, City of Alexandria, City of Fairfax, City of Falls Church, City of Manassas, and City of Manassas Park.

(b) *Rest of the State of Alaska COLA area.* OPM may collect survey data on-site, use alternative indicators of relative living costs (e.g., price and cost information published by the University of Alaska), or both. If the use of alternative indicators would result in a COLA rate reduction, OPM will conduct onsite surveys in one or more locations in the Rest of the State of Alaska COLA area, before making a reduction, to ensure that the reduction is warranted.

(c) *Determining Survey Coverage.* To aid OPM in determining survey coverage, OPM may from time to time conduct surveys of Federal employees

5 CFR Ch. I (1–1–04 Edition)

in the COLA areas and/or the Washington, DC, area to determine where employees shop and what they spend on certain goods or services and to collect other information related to the price surveys and the calculation of price indexes.

§ 591.216 How does OPM combine survey data for the DC area and for COLA areas with multiple survey areas?

(a) *Washington, DC, area.* For each survey item except shelter, OPM averages separately the prices collected in each of the DC survey areas identified in § 591.215(a) and then averages these average prices together using equal weights to compute an overall average by item for the DC area.

(b) *COLA areas with multiple survey areas.* OPM computes weighted average indexes at the PEG, MEG, and overall level by using the corresponding indexes and Federal employment weights from each survey area within the COLA area.

§ 591.217 In which outlets does OPM collect prices?

OPM collects prices in popular outlets in each survey area. OPM selects these outlets based on their proximity to the housing data collection areas, accessibility by road, physical size, advertising, and other characteristics that reflect sales volume. To the extent practical, OPM prices like items in the same types of outlets in the COLA areas and the Washington, DC, area. As warranted, OPM also may conduct point-of-purchase surveys and select outlets based on the results of those surveys.

§ 591.218 How does OPM compute price indexes?

Except for shelter and energy utilities, OPM averages by item the prices collected in each survey area. For the Washington, DC, area, OPM computes a simple average for each item based on the average prices from each DC survey area. On an item-by-item basis, OPM divides the COLA survey area average price by the DC average price and produces a price index.
